Letter No.D.10 dated 23rd August 1924 from the Deputy Commissioner, Kolar District to the Revenue Commissioner in Mysore.

======

In forwarding herewith an extract from letter dated the 23rd February 1924, from the Deputy Amildar of Gudibanda, requesting that a sum of Rs.500/- may be placed at the disposal of the president of the Gudibanda town Municipality for sinking drinking water wells, I have the honour to state that as wells were badly required in the town during the last distress, I placed in anticipation of sanction the sum required out of the allotment made to this District for this purpose and to request that sanction of Government may kindly be obtained to the action taken.

========

Extract from the D.O.dated 23rd Feb.1924 from the Deputy Amildar of Gudibanda to the Deputy Commissioner, Kolar.

I beg to invite your kind reference to my last report No.220/ 18-2-24 in the matter of placing at the disposal of the president Gudibanda town Municipality the sum of Rs.500/- promised by the Dewan Sahib for drinking water wells in the Gudibanda town and to request that the amount may kindly be ordered to be made available to the president at a very early date and permission accorded to him to utilise as much money out of the same as may be necessary for sinking temporary wells which may be required till the setting in of ( ) monsoons in order to meet the demands of the town people for water as the wells in the towns have been rapidly failing. Four temporary wells have been sunk in anticipation of sanction of the amount promised by the Dewan Sahib and water is tapped in all of them and people have been using water. But unfortunately the sides of the two of the said four wells, have collapsed on account of the excessive rush of water but nevertheless they have been supplying water to some extent. To provide revetment to these wells is very costly

and as such the idea is deferred for the present.

The Municipal Councillors suggest that that remains out of Rs.500/- after meeting the cost of temporary wells which have already been sunk and which will have to be sunk if in the meanwhile, the prospects of the season do not improve, may be used for making one of the best never-failing temporary wells a permanent one by providing revetment to it.
